

C-12 Huron

CRASH RESCUE

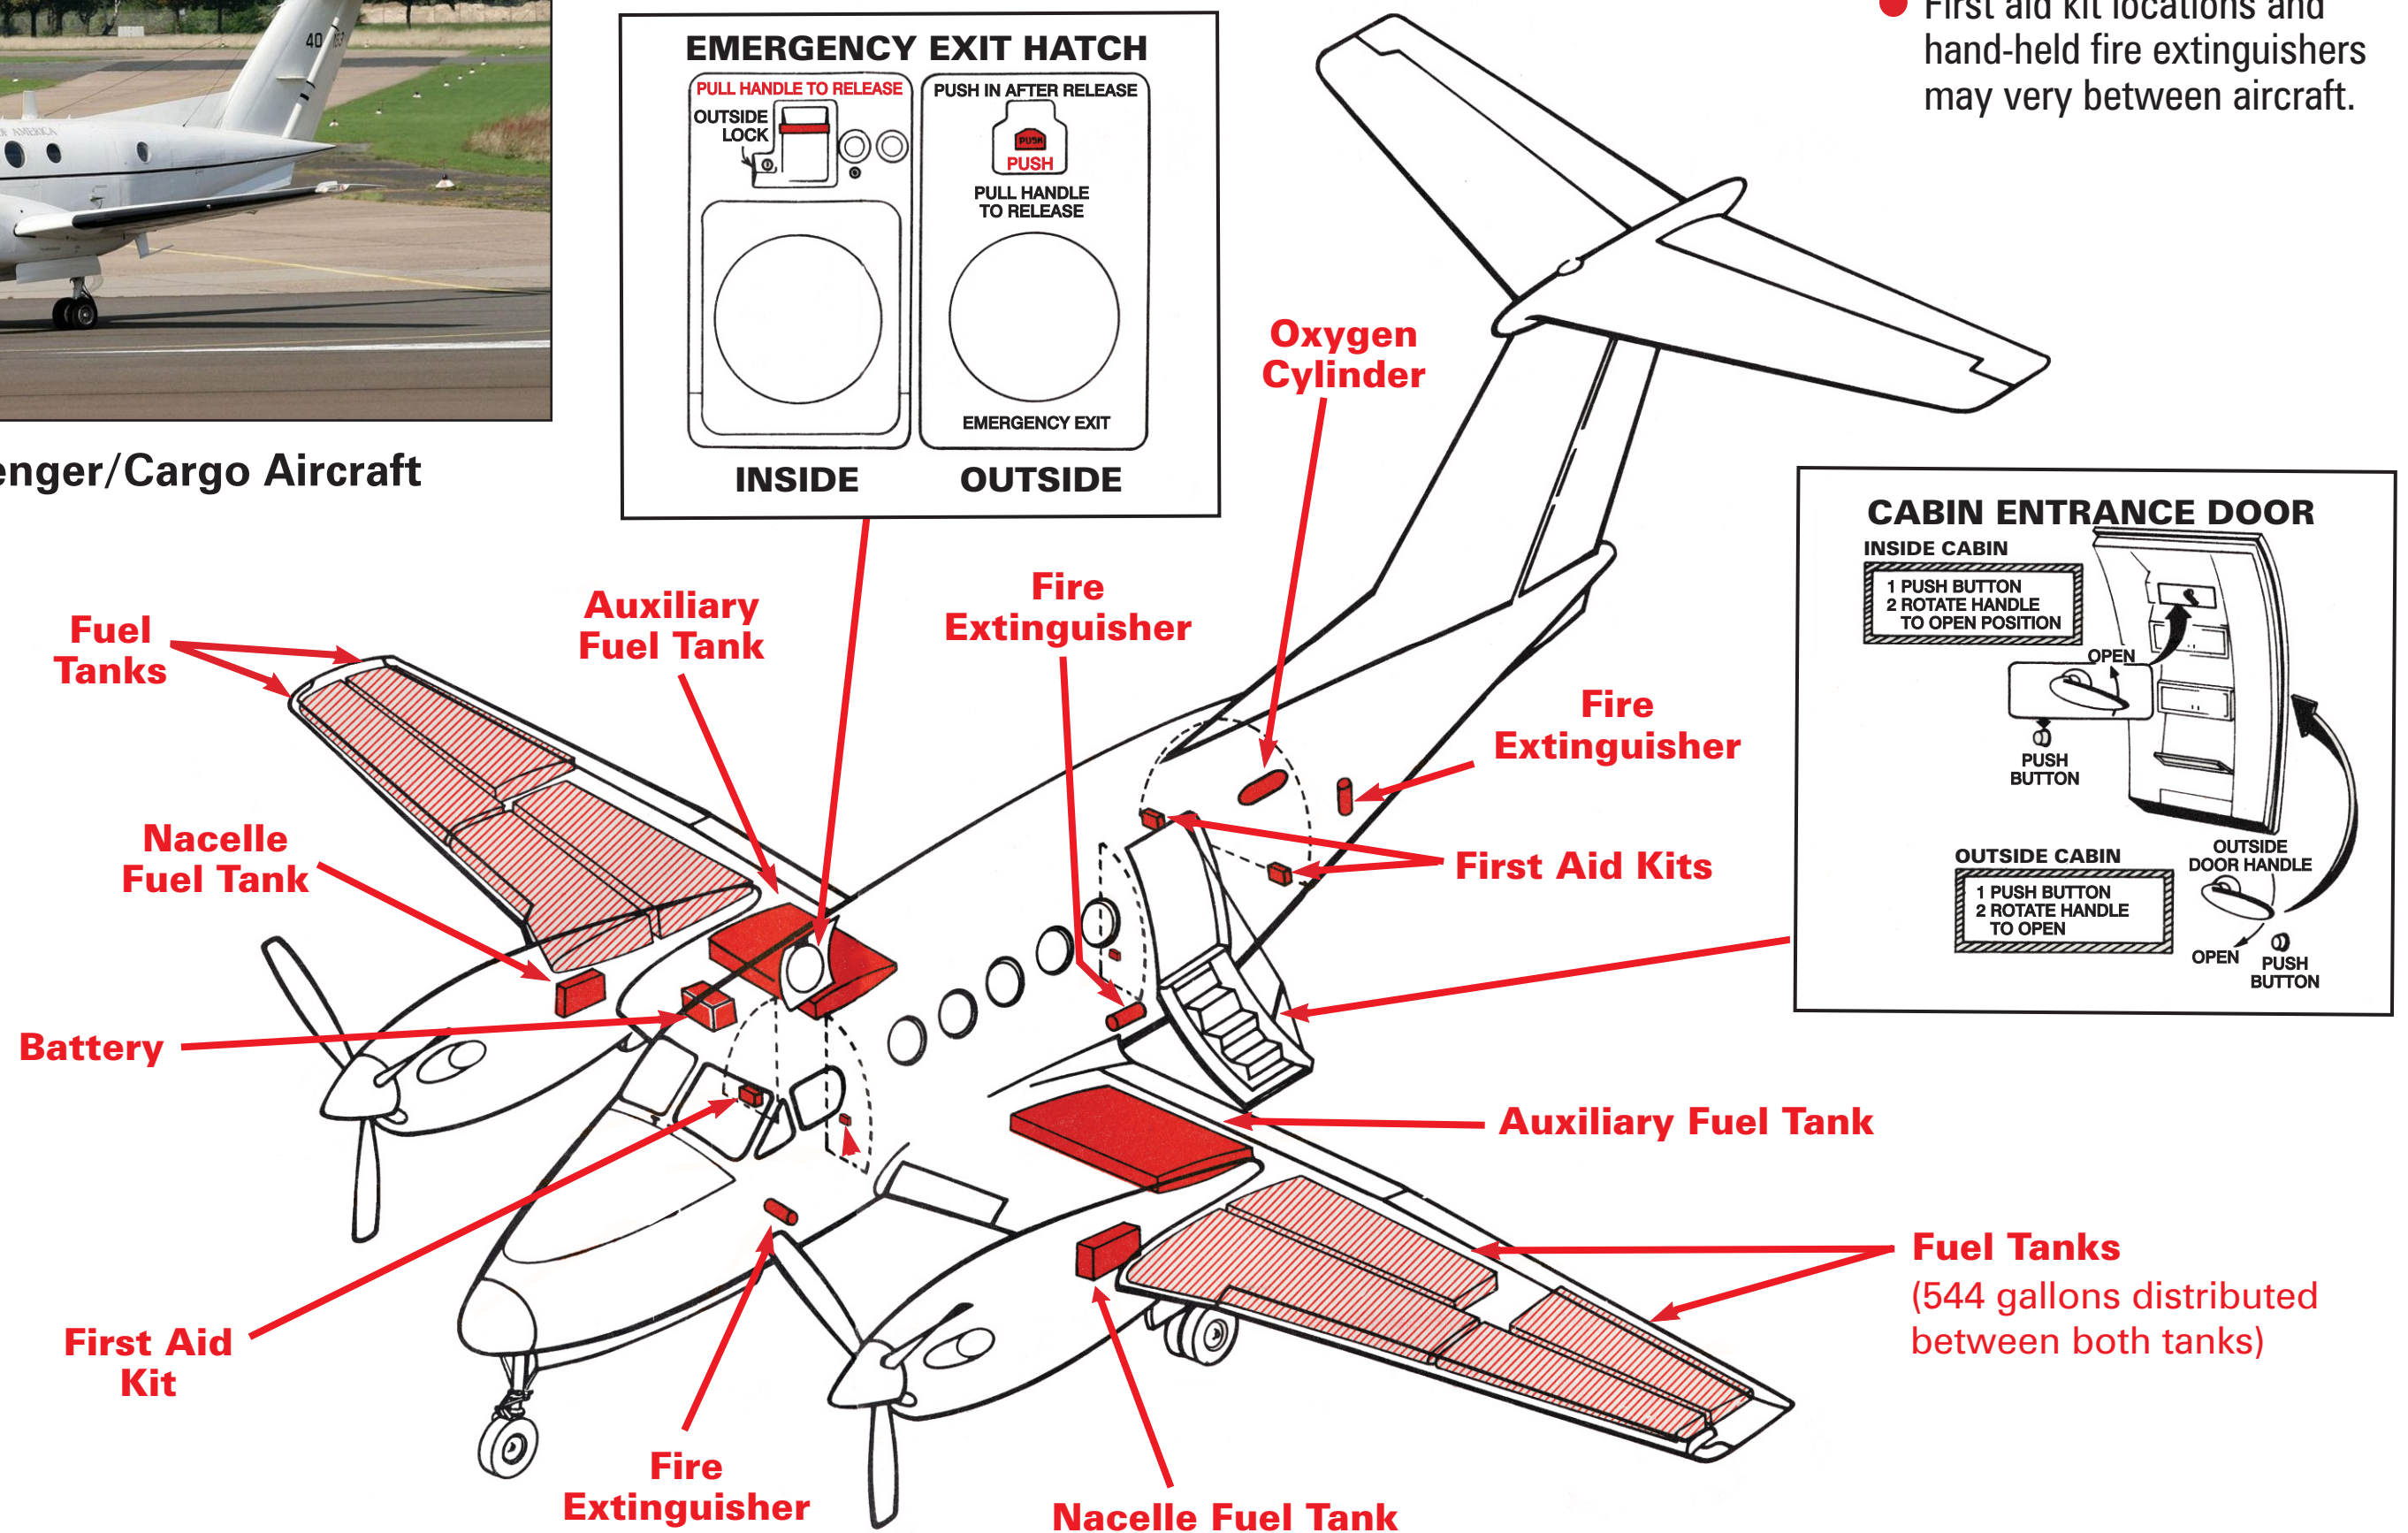

TYPE: Dual Engine Passenger/Cargo Aircraft

CREW: 2

PASSENGERS: 8

- Normal and emergency entrance is through the door on the left side of the cabin. Open door by pushing button and rotating handle clockwise (see entrance door inset diagram). If door fails to open, entry may be gained through the emergency hatch on the right side of the cabin. Open the emergency hatch by pushing in on the hatch (see emergency hatch inset diagram). Both the door and emergency hatch are equipped with internal releases.

WARNING: If conscious, ensure the pilot has full view of anyone approaching the aircraft. Avoid exhaust and propeller danger areas while aircraft engines are operating on the ground. The danger area extends 40 feet aft of the exhaust stack outlets.
